Art Unit 111

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

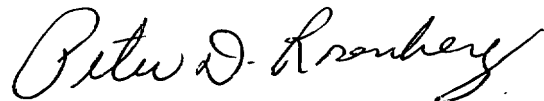

A person shall be entitled to a patent unless --
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1-20 rejected under 35 U.S.C. § 102(b) as being anticipated by McLauphlin.

McLauphlin directs high temperature plasma radiation wherein particles of titanium dioxide and hydrogen gas continuously flow countercurrently, the heat from the plasma reducing the titanium dioxide to elemental titanium. The reaction products are continuously separated.
